

I've been an XM subscriber for almost 3 years. XM provides excellent content and customer service. As a small business owner and truck driver my safety and profitability depend on timely information about weather and traffic conditions. There is no substitute for the service currently provided by XM. NONE. The broadcast media simply cannot compete with the quality of the XM service. I urge the FCC to reject any attempt to limit the scope of services provided by XM that I gladly pay for every month. Again, THERE IS NO COMPETITION - XM IS THE BEST.
